December 4, 2017

**AMENDMENT #3 – IFB027DPWT17** (C) Rehabilitation and Upgrade of the Virgin Islands Transit (VITRAN) Operations & Maintenance Facility (Bus Depot, Parking Area & Fuel Pumps Upgrade-Phase III), St. Thomas, U.S. Virgin Islands

**INSERT:     Bus Wash Specifications**

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.

BIDDERS MUST ACKNOWLEDGE RECEIPT OF THIS AMENDMENT WITH THEIR BID PROPOSAL.

## CustomKraft Bus Wash *MultiPressure* System to include:

Two (2) of the following components mounted, pre-wired, pre-plumbed on a stainless steel tubular frame:

- Baldor Super E 5 horsepower 3-phase motors
- CAT 5CP2120B ceramic plunger pumps
- *Timing belt drive systems*
- ABS plastic fully-encased belt guards
- Yaskawa 230 VAC *variable frequency inverters*
- MCI 230 VAC line reactors
- On-board circuit breakers
- Micron 100VA 230 VAC-24VAC fused transformers
- Wago plug-in terminal strips
- Stainless steel in-bay enclosures with rotary switch control
- *Stainless steel full-port inlet solenoids with lighted DIN connectors*
- 40' festoon (channel/trolley) systems for bay hose tracking
- 3000 psi (blue) non-marking hoses
- Trigger guns with extended wand and hardened stainless steel nozzle
- Stainless steel wand holsters
- Hog's hair foam brushes with vinyl-covered handles and stainless steel hanger

All products are gravity feed from stainless steel reservoirs with automatic chemical proportioning (picks-up chemicals automatically from buckets as water fills the tanks).

All plumbing is brass or stainless steel fittings.

System is set to deliver 4.0 gallons per minute (gpm) at 1500 pounds per square inch (psi).

Bay Wash Selections to include:

High-pressure Soap

Foam Brush

High-pressure Wax

High-Pressure Rinse

Stainless steel electrical enclosure includes safety lock-out and main system disconnect for regulatory compliance.

Delivery hoses and control wiring is included.

Installation manual included.
